We often believe things about ourselves that do not line up with God's truth. We think our worth is based on performance or possessions, that we have to be perfect to be loved, or that we're too ordinary to be used by God. Deeper tears down these lies and teaches women to replace them with four truths from Psalm 139--God knows me, he protects me, he made me, he values me. Using compelling narrative and Scripture, Deeper helps women transform their lives by trusting in the reality of God's love. Instead of striving for perfection and worth, readers can rest in the truth that they are his.

"I felt like I walked the walk and could implement many of the strategies after reading it once." —Andrea Golarz-Ziemba, Teacher O.P. Morton Elementary School, Hobart, IN "If our newest teachers came out of college with this knowledge, supplemented with the learning standards, their students would be more successful from day one." —Patti Larche, Director of Curriculum and Instruction Phelps-Clifton Springs CSD, NY Practical strategies to take your students' understanding from "So what?" to "Wow!" With the amount of content that teachers have to teach, how can we ensure that students gain a deep and lasting understanding of what they have learned? Based on the most current research on cognition and the brain, this exciting book for Grades 4–12 provides teachers with a systematic, reflective approach to incorporating powerful learning and content processing techniques into everyday instruction. Nationally recognized experts Eric Jensen and LeAnn Nickelsen outline the Deeper Learning Cycle (DELIC), an instructional model that incorporates brain research, standards, and individual learning differences, to help educators teach for deeper understanding and critical thinking. This invaluable resource includes: In-depth chapters explaining the seven stages of the DELIC: planning with standards and curriculum, pre-assessing, building a positive learning culture, priming and activating prior knowledge, acquiring new knowledge, processing the learning, and evaluating student learning A Deeper Learning lesson plan template to apply to daily instruction 50 strategies to differentiate instruction based on learning levels and to help students process content in meaningful ways Reflection questions to help teachers apply the material to their own practice Deeper Learning is a powerful tool to promote and support student progress beyond the surface level of understanding in any subject area.

Tunnels (Tunnels #1)

The New York Times Bestseller! The story of an outcast boy, his eccentric dad, and the scary underground world they discover through secret TUNNELS. 14-year-old Will Burrows has little in common with his strange, dysfunctional family. In fact, the only bond he shares with his eccentric father is a passion for archaeological excavation. So when Dad mysteriously vanishes, Will is compelled to dig up the truth behind his disappearance. He unearths the unbelievable: a secret subterranean society. "The Colony" has existed unchanged for a century, but it's no benign time capsule of a bygone era--because the Colony is ruled by a cultlike overclass, the Styx. Before long--before he can find his father--Will is their prisoner....

Deeper City

Deeper City is the first major application of new thinking on 'deeper complexity', applied to grand challenges such as runaway urbanization, climate change and rising inequality. The author provides a new framework for the collective intelligence – the capacity for learning and synergy – in many-layered cities, technologies, economies, ecologies and political systems. The key is in synergistic mapping and design,

which can move beyond smart ‘winner-takes-all’ competition, towards wiser human systems of cooperation where ‘winners-are-all’. Forty distinct pathways ‘from smart to wise’ are mapped in Deeper City and presented for strategic action, ranging from local neighbourhoods to global finance. As an atlas of the future, and resource library of pathway mappings, this book expands on the author’s previous work, City-Region 2020. From a decade of development and testing, Deeper City combines visual thinking with a narrative style and practical guidance. This book will be indispensable for those seeking a sustainable future – students, politicians, planners, systems designers, activists, engineers and researchers. A new postscript looks at how these methods can work with respect to the 2020 pandemic, and asks, ‘How can we turn crisis towards transformation?’

Going Deeper

In the aftermath of 9/11 . . . Larry, a successful young Los Angeles lawyer, and his dog, Zeus, negotiate a life-changing, two-and-a-half-day odyssey that leads them to Joshua Tree National Park. There, Larry encounters an array of unlikely teachers including talking trees and stones, white buffaloes, and a rap-spouting raccoon. These unorthodox characters mock conventional wisdom with irreverential humor to reveal to him the back-stage mechanics of Creation. Larry for the first time understands who he really is and why he has chosen to be born on Earth at this precise time. He also comes to appreciate the perfection of the Great Experiment and the extraordinary possibilities awaiting the human race; should it awaken before it's too late.

Encountering God Leads to Spiritual Intimacy and Transformation. Some believe that learning about God is like looking for something inside the refrigerator—the air is cool and you can never find what you’re looking for. Or perhaps the word boring best describes your experience of studying theology? Bible studies about knowing God are often mechanical and systematic. In *Go Deeper*, Ken Jung provides an alternative way—story theology for experiencing God. *Go Deeper* invites you to explore your relationship with God by placing yourself into the biblical narratives. By doing so, readers will encounter the God who passionately pursues us with His sovereignty, holiness, presence, grace, and love. The result: we are transformed in the process.

The Other Deeper You

The Other Deeper You continues in the revolutionary Quixotic spirit of Dr. Alvin Mahrer's previous works on experiential psychotherapy. For the visionary, the scholar, the academic, the serious reader, picture a whole new inner deeper world containing a whole new you, an other deeper you. This concept itself is revolutionary, but the book goes further by providing a step-by-step guide for coming face-to-face with the other deeper you.

A Deeper Learning Companion for CLIL

Christina Sell knows the difference between a surface buzz in the yoga business (for a better, more beautiful “ME”), and its roots as an ancient practice of ethical life and spiritual transformation. With over twenty-five years “on the mat,” her voice of courage and sanity has never stopped urging yoga students and teachers alike to take a deeper dive: to confront media hype about body-image and the promise of any quick-fix in favor of a lifelong commitment to wholeness and freedom. This book is both an epitome of that call, and a practical guide to ongoing self-discovery. As the author of two previous books: *Yoga From the Inside Out* (2003) and *My Body Is a Temple* (2013), Christina Sell holds an international reputation as a gifted and compassionate teacher and trainer of yoga. As a former gymnast who dealt with eating disorders and addictions in her early years, Christina knows how to redirect thoughts and habits of negative body image toward spiritual practice and inner-awakening. *A Deeper Yoga* is for any practitioner or teacher who wants tools and support in finding a loving, expanded relationship with his or her body, mind, emotions and spirit. Her book is for anyone on the path of yoga. Newer yoga students will benefit from the compassionate explanations of the inner journey and find direction in building a stronger foundation of practice. Experienced yoga practitioners will find a refreshing and honest exploration of both the hype and the heart of the work. Teachers of all traditions will benefit from the ongoing reminder that yoga is not only for the body, but for transformation of consciousness and spiritual unfolding. This is a book for the long haul! *A Deeper Yoga* is uniquely aimed at practitioners who initially found help from yoga, but who are now experiencing impatience, discouragement or even disillusionment. It leads the reader to yoga’s more esoteric teachings, using language without jargon or unnecessary details. The tone is compassionate, yet strong and authoritative?inviting us to empower our own deeper knowing, yet without watering down the traditional teachings. Topics of body image, self-hatred, eating disorders, addiction and emotional imbalance are considered throughout. Christina skillfully dismantles the illusions and early conditionings that lead to unrealistic norms of perfection and empower a media-driven standard of beauty. *A Deeper Yoga* offers an alternative view of genuine beauty.

The Montclair State University case is one of seven that form the basis for the arguments and analyses presented in *Preparing Teachers for Deeper Learning*. Each case outlines the context, vision, and practices guiding a particular program’s enactment, and includes sample curricula, assessment and feedback forms, and the program details that have contributed to its success. The cases are valuable reading for educators involved in developing teacher candidates who are self-directed, collaborative, social justice–focused, and prepared to meet the needs of today’s students and a changing society.

Microfossils are an abundant component of the sedimentary rock record. Their analysis can reveal not only the environments in which the rocks were deposited, but also their age. When combined, the spatial and temporal distribution patterns of microfossils offer enormous utility for archaeological and forensic investigations. Their presence can act as a geological ‘fingerprint’ and the tiniest fragment of material, such as a broken Iron Age potsherd, can contain a microfossil signature that reveals the geographical source of the materials under investigation. This book explores how microfossils are employed as tools to interpret human society and habitation throughout history. Examples include microfossil evidence associated with Palaeolithic human occupation at Boxgrove in Sussex, alongside investigations into human-induced landscape change during the Holocene. Further examples include the use of microfossils to provenance the source materials of Iron Age ceramics, Roman mosaics and Minoan pottery, in addition to their application to help solve modern murder cases, highlighting the diverse applications of microfossils to improving our understanding of human history.

Loneliness is an epidemic, but you can live life with a deep sense of belonging. If you’ve ever felt that ache to connect and belong, you’re not alone: three out of every five people are suffering from loneliness. No group is excluded—married, unmarried, parents, pastors, leaders, elderly, and teenagers. We all experience moments . . . or long seasons of heart-aching loneliness. And it hurts. It can hurt right to the core. In *Cultivating Deeper Connections in a Lonely World*, relationship expert, mother, grandmother, and John Maxwell Certified Coach Becky Harling taps into the deep ache of loneliness and shares with readers a rich theology of belonging. Does God ache for us? What does it mean that we belong to Him? How do we establish a deeply bonded relationship with others? What steps can we take to improve our relationships? Because we were made for God and for community, relational isolation or brokenness is incredibly painful. But we don’t have to live isolated and unconnected. In fact, we must not. Our souls were designed for more. Deeply rooted in Scripture and joined with reflection questions, this book shows us how we can strengthen our relationships and experience deep connection.

Cultivating Deeper Connections in a Lonely World

Hell exists. It is a real, geological, historical place beneath our very feet. And it is inhabited savagely. In an intense and imaginative tour de force, New York Times bestselling author Jeff Long takes readers into the depths of the earth where a primordial intelligence waits in the darkness. A decade has passed since doomed explorers unveiled a nightmare of tunnels and rivers honeycombing the earth's depths. After millennia of suffering terror and predation, humanity's armies descended to destroy the ancient hordes. Deep beneath the Pacific Ocean, a doomed science expedition killed the subterraneans' fabled leader, and suddenly it seemed that evil was dead and all was right with the world again. Now *Deeper* arrives to explode that complacency and plunge us back into the sunless abyss. Hell boils up through America's subways and basements to take its revenge and steal our children. Against the backdrop of a looming war with China, a crusade of volunteers races to find the vestiges of a lost race. But a lone explorer, the linguist Ali von Schade, learns that a far greater menace lies in the unexplored heart of the planet. The real Satan can't be killed, and he has been waiting since the beginning of time to gain his freedom. Man and his pitiless enemies are mere pawns in the greatest escape ever devised. Mesmerizing and concussive, this darkly brilliant work of imagination galvanizes Jeff Long's reputation as a prodigious talent. At once a love story, the ultimate thriller, and an extreme adventure, *Deeper* will leave you breathless.

Sub-prime crisis in Australia? A deeper insight

The deeper secret is revealed not merely as one law of attraction, but in the twelve laws of creation. In this passionately persuasive book, we learn about these laws of creation and how we can harness them. Annemarie Postma explains how the combination of three simple principles form the deeper secret - how you can gain access to your own powerful system of creation to create miracles of joy, happiness and fulfilment in your everyday life. Using skilful tools, she creates the loving conditions for awakening within us that has been yearning to be born for so long - our precious life force. "Nothing will simply fall out of the sky, however you much you wish for it, and however positively you think. The real secret is how you can get what you wish yourself: by knowing how you should wish, and that an inner decision is inherent to a wish, the decision to really want it - not with your head but with your heart."

Harnessing Technology for Deeper Learning

"The best book on high school dynamics I have ever read."--Jay Mathews, Washington Post An award-winning professor and an accomplished educator take us beyond the hype of reform and inside some of America's most innovative classrooms to show what is working--and what isn't--in our schools. What would it take to transform industrial-era schools into modern organizations capable of supporting deep learning for all? Jal Mehta and Sarah Fine's quest to answer this question took them inside some of America's most innovative schools and classrooms--places where educators are rethinking both what and how students should learn. The story they tell is alternately discouraging and hopeful. Drawing on hundreds of hours of observations and interviews at thirty different schools, Mehta and Fine reveal that deeper learning is more often the exception than the rule. And yet they find pockets of powerful learning at almost every school, often in electives and extracurriculars as well as in a few mold-breaking academic courses. These spaces achieve depth, the authors argue, because they emphasize purpose and choice, cultivate community, and draw on powerful traditions of apprenticeship. These outliers suggest that it is difficult but possible for schools and classrooms to achieve the integrations that support deep learning: rigor with joy, precision with play, mastery

with identity and creativity. This boldly humanistic book offers a rich account of what education can be. The first panoramic study of American public high schools since the 1980s, *In Search of Deeper Learning* lays out a new vision for American education--one that will set the agenda for schools of the future.

The Deeper Secret

Far too often, our students attain only a superficial level of knowledge that fails to prepare them for deeper challenges in school and beyond. In *Teaching for Deeper Learning*, renowned educators and best-selling authors Jay McTighe and Harvey F. Silver propose a solution: teaching students to make meaning for themselves. Contending that the ability to "earn" understanding will equip students to thrive in school, at work, and in life, the authors highlight seven higher-order thinking skills that facilitate students' acquisition of information for greater retention, retrieval, and transfer. These skills, which cut across content areas and grade levels and are deeply embedded in current academic standards, separate high achievers from their low-performing peers. Drawing on their deep well of research and experience, the authors - Explore what kind of content is worth having students make meaning about. - Provide practical tools and strategies to help teachers target each of the seven thinking skills in the classroom. - Explain how teachers can incorporate the thinking skills and tools into lesson and unit design. - Show how teachers can build students' capacity to use the strategies independently. If our goal is to prepare students to meet the rigorous demands of school, college, and career, then we must foster their ability to respond to such challenges. This comprehensive, practical guide will enable teachers to engage students in the kind of learning that yields enduring understanding and valuable skills that they can use throughout their lives.

When Caroline Piasecki's ex-boyfriend posts their sex pictures on the Internet, it destroys her reputation as a nice college girl. Suddenly her once-promising future doesn't look so bright. Caroline tries to make the pictures disappear; hoping time will bury her shame. Then a guy she barely knows rises to her defence and punches her ex to the ground. West Leavitt is the last person Caroline needs in her life. Everyone knows he's shady. Still, Caroline is drawn to his confidence and swagger - even after promising her dad she'll keep her distance. On late, sleepless nights, Caroline starts wandering into the bakery where West works. They hang out, they talk, they listen. Though Caroline and West tell each other they're 'just friends,' their feelings intensify until it becomes impossible to pretend. The more complicated her relationship with West gets, the harder Caroline has to struggle to discover what she wants for herself - and the easier it becomes to find the courage she needs to fight back against the people who would judge her. When all seems lost, sometimes the only place to go is deeper.

Deeper than the ocean is a book of poetry diving into all the emotions of grief, love, and heart break. The book is divided into two chapters, before the death of a loved one and the life changing moments after. Emma tells her story beautifully, a story I believe a lot of people could relate to. And I believe reading something so relatable has a true healing essence to it.

Deeper Than You Think

What is the primary purpose of business? The standard answer is 'making profits,' but some visionary entrepreneurs and leaders fundamentally disagree. Instead of just making money, they choose instead to "dig deeper" and make a difference through creating real value – improving the lives of others even as they find deeper meaning in their own. These leaders build enterprises that provide identity and a sense of purpose, create positive relationships and a place to learn and thrive, embed sustainability in all that they do, and strive to improve the quality of life of all of their stakeholders. Although not their primary focus, they also make healthy profits, as their unique approach to value creation provides them with a sustainable competitive

edge. Digging Deeper is a book full of inspiring stories that illustrate that there is an alternative to a myopic and narrow capitalism that trades in inequalities, exploitation, collective burnout and negative consequences for our shared natural environment. Remarkable examples from all over the world vividly demonstrate how enterprises can create real value through focusing on what the authors call the 6 Ls: long-term orientation, lasting relationships, local roots, limits recognition, developing a learning community and taking leadership responsibility seriously in its very best sense. Digging Deeper liberates the term “value” from the tight chains in which the global financial community has bound it and demonstrates that businesses can contribute to a better life for all if their leaders can go beyond viewing enterprises as single-purpose money-making machines and develop purpose-driven enterprises that create real value for all.

Studies suggest that up to half of high school dropouts leave school because their classes are boring or irrelevant to their lives and aspirations. Yet the majority of U.S. schools continue their attempts to engage some 50 million students through conventional methods such as lectures, note-taking, and rote learning, often with dismal results. In *Deeper Learning*, award-winning education strategist Monica Martinez and education sociologist Dennis McGrath offer a transformative framework for learning that has led to standout results in schools across the country and has the potential to support the development and success of every student. Through examples from eight public schools, the authors chart the path to crafting flexible learning environments that meet the widely varied needs of individual students. They showcase interactive approaches that compel students to learn how to learn and provide an invaluable guide for teachers and communities wondering how their schools will be able to adapt to the Common Core standards and new assessments. Above all, *Deeper Learning* shows how inspired, engaging education does not have to be the province of elite private schools and how all young people can become creators, collaborators, and critical thinkers.

Deeper Than The Ocean

We are not alone. Some call them devils or demons. But they are real. They are down there. And they are waiting for us to find them. In a cave in the Himalayas, a guide discovers a self-mutilated body with a warning: Satan exists. In the Kalahari Desert, a nun unearths evidence of a proto-human species and a deity called Older-than-Old. In Bosnia, something has been feeding upon the dead in a mass grave. So begins mankind's most shocking realization: the underworld is a vast geological labyrinth populated by another race of beings. With all of Hell's precious resources and territories to be won, a global race ensues. Nations, armies, religions, and industries rush to colonize and exploit the subterranean frontier. A scientific expedition is launched westward to explore beneath the Pacific Ocean floor, both to catalog the riches there and to learn how life could develop in the sunless abyss. But in the dark underground, as humanity falls away from them, the scientists and mercenaries find themselves prey not only to the savage creatures, but also to their own treachery, mutiny, and greed. One thing is certain: Miles inside the earth, evil is very much alive.
